

Biochemistry Major, Bachelor of Arts (56 credit hours)

The Biochemistry major is an interdisciplinary major that applies the principles and methods of both biology and chemistry to understanding the molecular basis of life. The major requires a number of basic classes from each discipline with advanced courses in chemical instrumentation, cell and molecular biology, genetics, and biochemistry, and allows the student to select additional courses necessary to pursue certain career objectives.

Major Requirements:

BIOL 1000, 2230, 3800, and 4700 do not apply toward the major
CHEM 1000 and 2700 do not apply toward the major
