We understand that people can get sick any time, so Community is here for you when illness hits unexpectedly and you need to get care from the comfort of home. Anderson University students can see our board-certified providers any time for common respiratory, GI, ear, nose, throat, eye and skin concerns.

Community Virtual Care connects Anderson University students with board-certified providers to receive care for minor illnesses and injuries virtually. Visits are completed over the phone or through a secure video visit.

Community Virtual Care is integrated with Community's EMR and patients will have access to their after visit summary through MyChart. In addition to the list of services, Virtual Care providers can help prescribe medications, refill medications, and order point-of-care testing (flu, strep, etc.). Please note that the providers cannot prescribe medications for psychiatric needs, nor refill prescriptions for controlled substances.

Scan the QR code to start your Community Virtual Care visit:

In the **Already a Member** section:

Select **Get Care**; then select **"Start Virtual Visit"**

Select **Virtual Care Instructions** for step-by-step assistance
